

# 469 AUTO FEED DEEP THROAT FOOT PRESS

## Stimpson 469 Auto Feed Deep Throat Eyelet / Grommet Setting Machine

The Stimpson 469 was designed to auto feed eyelets and grommets ranging from 1/8 inch to 1/4 inch. All auto feed eyelet and grommet machines are capable of setting one diameter eyelet barrel only. These machines are used for larger production runs where one size eyelet or grommet is exclusively used. The 11 inch deep throat depth of the 469 machine is its most popular feature. It is also available with an optional steel bottom arm for products with tight clearance, and an optional frame extensions to raise the level of the setting area.
