

489 ELECTRIC POWERED EYELET MACHINE

Stimpson 489 Electric Powered Auto Feed Eyelet Setting Machine

The Stimpson 489 electric powered eyelet machine is a high quality automatic feed eyelet machine designed and manufactured for long trouble free service under demanding usage. Low cost, simple to operate with minimal maintenance makes this the perfect entry level auto feed electric setting machine. The 489 machine was designed to auto feed eyelets and grommets ranging from 1/8 inch to 1/4 inch. All auto feed eyelet and grommet machines are capable of setting one diameter eyelet barrel only. These machines are used for larger production runs where one size eyelet or grommet is exclusively used. The 489 is also available with an optional steel bottom arm for products with tight clearance, and an optional frame extensions to raise the level of the setting area.

Size Capacity: 1/8 inch diameter eyelets to a 1/4 inch eyelet or grommet

Advantages: Electric assist greatly reduces operator fatigue. Auto feeding of the eyelet or grommet improves productivity.
