

J-99 DUAL FEED SPEEDY RIVET MACHINE

J-99 Dual Feed Electric 2 Part Speedy Rivet Setting Machine

The J-99 is an electric powered dual feed speedy rivet machine that feeds both parts of the speedy rivet into pre-punched leather, cloth, plastics, nylon webbing and most other materials. The speedy rivet is also called a quick rivet or compression rivet and consists of two parts, the stem and the cap. This machine will auto feed both parts and set them in your pre-punched material. Like all auto feed machines, the J-99 is set up to run one size speedy rivet only.

Size Capacity: The J-99 can be set up to run most popular size speedy rivets from 1/8 inch to 9/64 inch

Advantages: Cost effective, easy to operate and very efficient. The dual feed increases your production and makes a perfect setting. Stem and cap detector insure that the machine cycles only if both parts are present.

Maintenance: Lubrication with 30wt motor oil before use is recommended

Optional Equipment:

* Mobile stand with casters

Specifications:

Dimensions: 28 inches deep, 35 inches wide, 55 inches high

Weight: 296 pounds

Electrical requirement: 110 Volt AC single phase – standard wall outlet

Motor Size: 1 HP,

Pneumatic requirement: None
