

# UNITED SHOE MACHINERY MODEL C

## USM Model C Rapid Shoe Eyelet Setting Machine

The Model C machine has been the staple in the shoe and boot manufacturing industries for over 50 years. Its ability to punch the hole, space the eyelet, feed the material and then set the eyelet at 450 per minute, make this machine the fastest and most efficient eyelet setting machine for shoe and boot uppers in the world. The spacing between the eyelets is easily adjustable to accommodate most all shoe and boot upper eyelet spacing. The eyelet feeder is easily removed to allow the machine to be used as a hole puncher only. Like all auto feed eyelet machines, the Model C is set up to run one barrel diameter size eyelet only. Additional eyelet feeders can be purchased to change eyelet sizes quickly and easily making this machine very versatile.

**Size Capacity:** All industry standard shoe and boot eyelets

**Advantages:** Extremely fast and accurate eyelet setting machine that feeds the eyelets and the uppers, spaces and sets. A shoe or boot upper can be eyeleted in 3 seconds

**Maintenance:** Lubrication with 30wt motor oil before use is recommended

**Optional Equipment:** Interchangeable raceways to run different eyelets are available.

Heavy duty worktable

LED table work light

### **Specifications:**

Dimensions: 24 X 36 inches high, mounted on table: 52 inches high

Weight: 195 pounds

Electrical requirement: 110 Volt AC single phase – standard wall outlet

Re-manufactured units available only. A rebuilding service is available to bring your machine back to new operating condition.
