

TYPE 10 ELECTRIC POWERED RIVET MACHINE

Stimpson Type 10 Electric Powered Auto Feed Rivet Setting Machine

The Stimpson Type 10 electric powered rivet setting machine was designed to auto feed and set rivets. The Stimpson Type 10 is the heavy duty version of the smaller Stimpson C1 Rivet Machine. The machine is capable of running rivets with lengths from 7/32 inch to 9/16 inch. The all cast iron and tool settle design insures long life and trouble free operation. The machine has an adjustable drop arm and has a throat depth of 10 1/4 inches. The Type 10 will drive and set the rivet thru your material in one machine cycle. Like all auto feed rivet machines, the Stimpson Type 10 machine is capable of setting one diameter rivet only. The machine will however set different length rivets of the same diameter.

Size Capacity: CE-100 (1/8 inch diameter) and CE-125 (8/16 inch diameter) rivets

Advantages: Pierces the material and sets the rivet in one revolution. Cost effective and easy to operation

Size Capacity: CE-100 (1/8 inch diameter) and CE-125 (9/16 inch diameter) rivets

Advantages: Pierces the material and sets the rivet in one revolution. Cost effective and easy to operate
